Draw yourself in the box on the next page. Think about how you are feeling right now. Are you happy? Sad? Angry? Use colours to show what mood you are in.

COLOURS

The young photographers in this exhibition use photograph to explore lives played out in front of them, often creating a heightened experience through the use of colour. Things like colour and contrast have a huge effect on art, eg. colours like red & orange being WARM and blue being COLD.

Do you think that colours represent or have an effect on how we feel? Colours can make an image more powerful, interesting & eye-catching?
